

Kids, Vaayu & Corona 2: Pandemic Defeated (A comic series for COVID-19 Prevention)

There is growing concern and perceived threat about the Coronavirus among common citizens. The population of all ages is making use of available media such as newspapers, social media and television to make themselves aware. From adults to children, most of the discussion these days are centering around the Coronavirus. But for children, especially those below the age of 14 years, Coronavirus has become a cause of concern as they are not able to comprehend the talks and getting worried. The parent should talk to them and resolve their queries so they do not panic.

Sometimes parents might be busy and they might not be able to resolve their queries. Considering this PGIMER- Chandigarh, India and Panjab University- Chandigarh, India created this second part of the comic to make children aware about the threat of Coronavirus and clear some of the doubts and how to remain safe through simple precautionary steps. This comic is created to learn, along with fun and motivate children to be a hero of prevention by defeating corona and other infectious germs.

Technical Support:

Kids are playing indoor, and one kid (Adi) receives a telephone call, and he seems jumping.

Adi, What happened. Why are you so happy?

My father was in Italy for a business trip, and he will be back today.

You know, he went for 3 months, but he is coming early!

This is good news

But why? All well!

You remember, Vaayu told us about Coronavirus infection. That virus has spread fast in Italy and other countries.

Wow!

Globemaster is a big aeroplane used for transportation and also for carrying/evacuating affected people during disasters.

Thank you Indian Air Force ❤️

The next day, when kids meet!

You look worried, Adi?
Is your father back?

Yes, my father is
back. But I cannot
meet him for atleast
two weeks.

I talked to Mom, and she told
me that he is coming back from a
country affected by Coronavirus and
hence put in quarantine
for two weeks.

Ohh, that's why you
are panic! But why you
can't meet your father.

Qu.. Qu.. Quarantine?

Adi starts weeping and Kids seems worried.

Do not panic, Adi!
Your father will be fine,
and everything will be ok!

Yes, but I am worried.
I have a lot of queries
who can help!

Let's talk to Vaayu.
He is our best friend and
will help us.

Vaayu! Vaayu! Vaayu!

ohh!
The kids seem to be panic!
I must visit them.

Surfaces such as elevator button, garden seats, play area swings, door knobs at public places, bus and train handles.

Kids, do you also remember the symptoms of Coronavirus disease?

Yes, Coronavirus disease is known as COVID-19.

Headache

Cough & Cold

Dry Cough

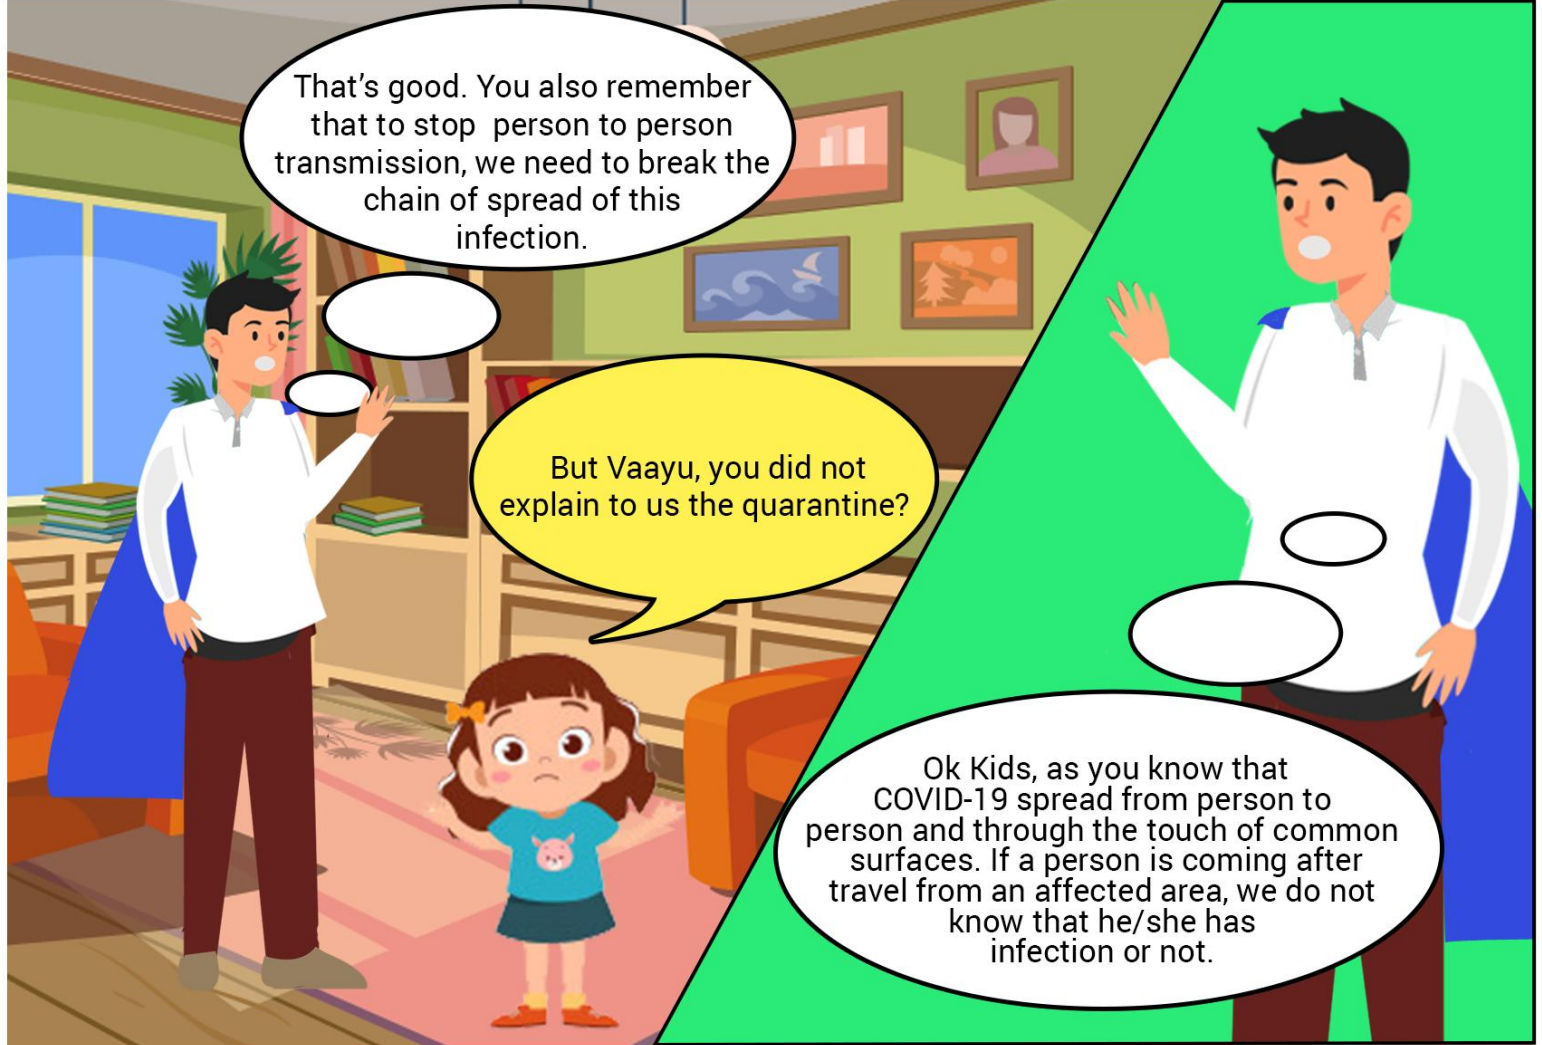

Breathing Problem

High Fever

I remember the symptoms. They are ...

That's good. You also remember that to stop person to person transmission, we need to break the chain of spread of this infection.

But Vaayu, you did not explain to us the quarantine?

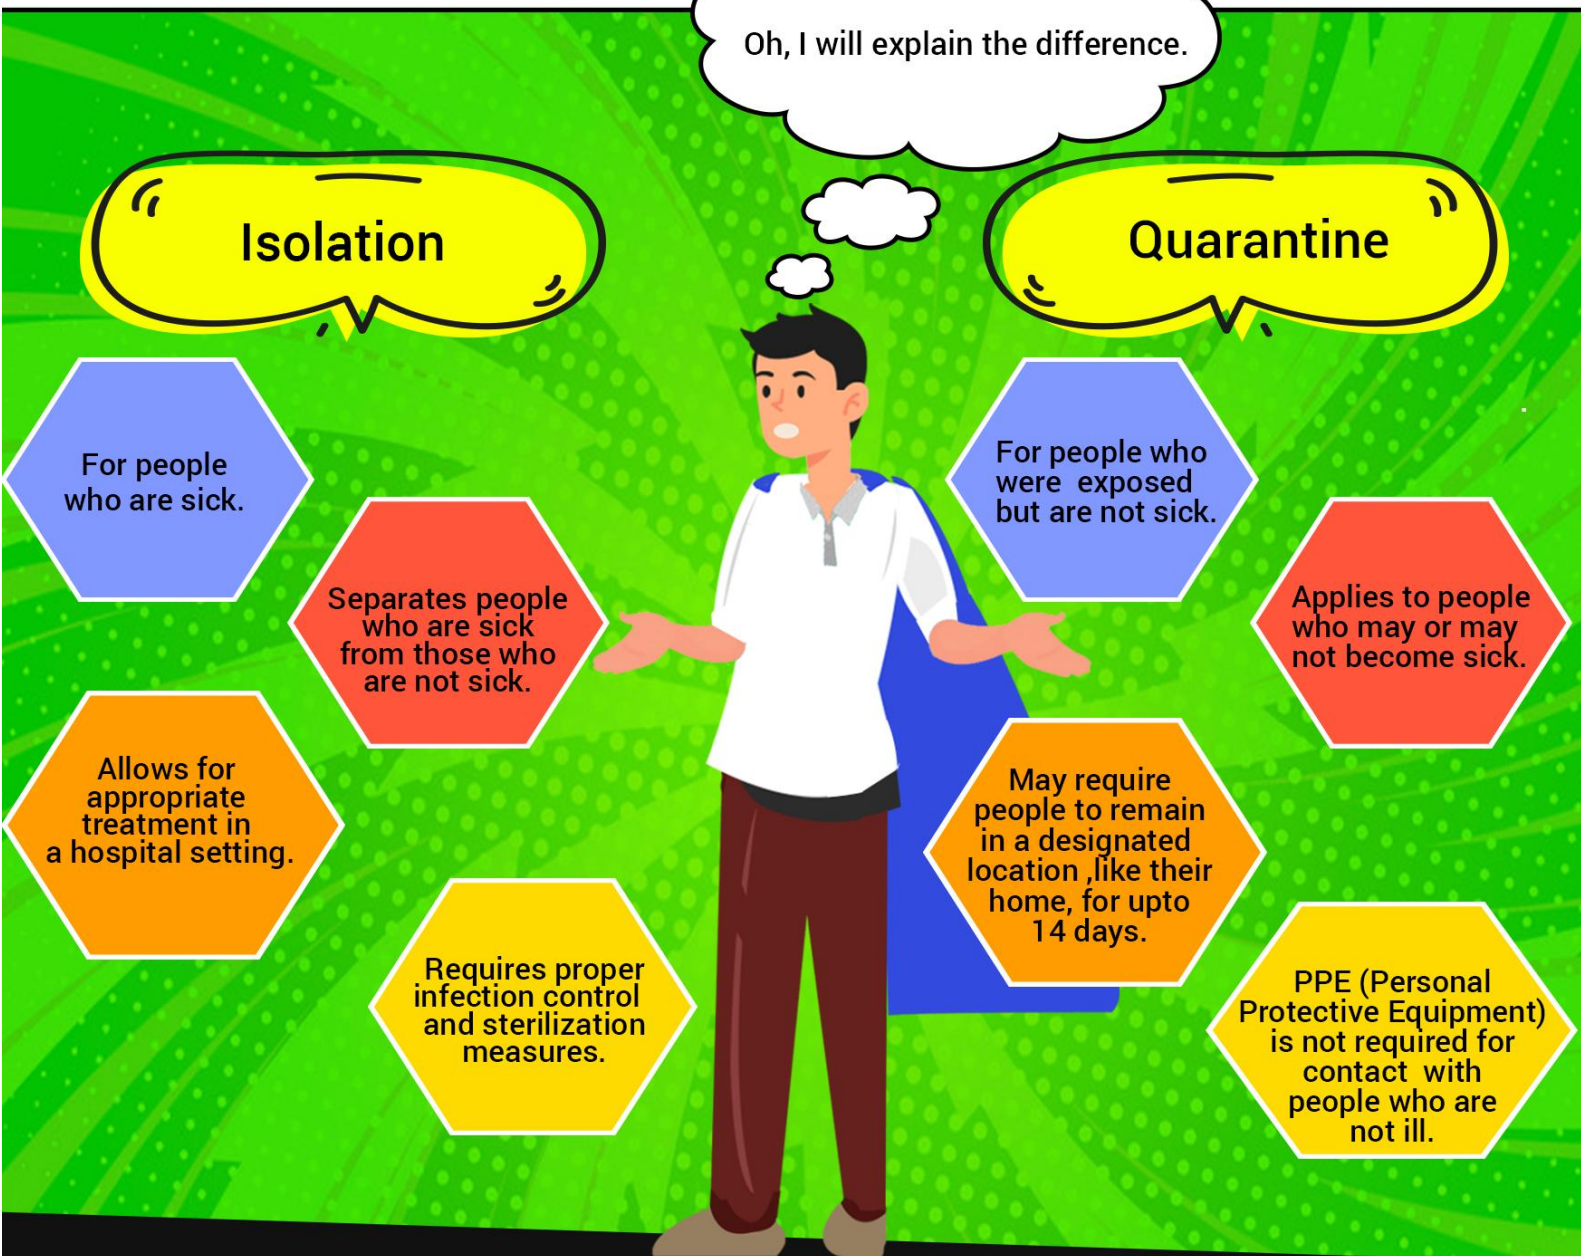

Ok Kids, as you know that COVID-19 spread from person to person and through the touch of common surfaces. If a person is coming after travel from an affected area, we do not know that he/she has infection or not.

We will keep the person under observation for two weeks to check if he/she has infection or show the symptoms of disease.

If he/she develop the symptoms, can be isolated at the earliest, for medical care. If he/she do not show the symptoms, will be free to go.

Thanks Vaayu, bu..bu..but..

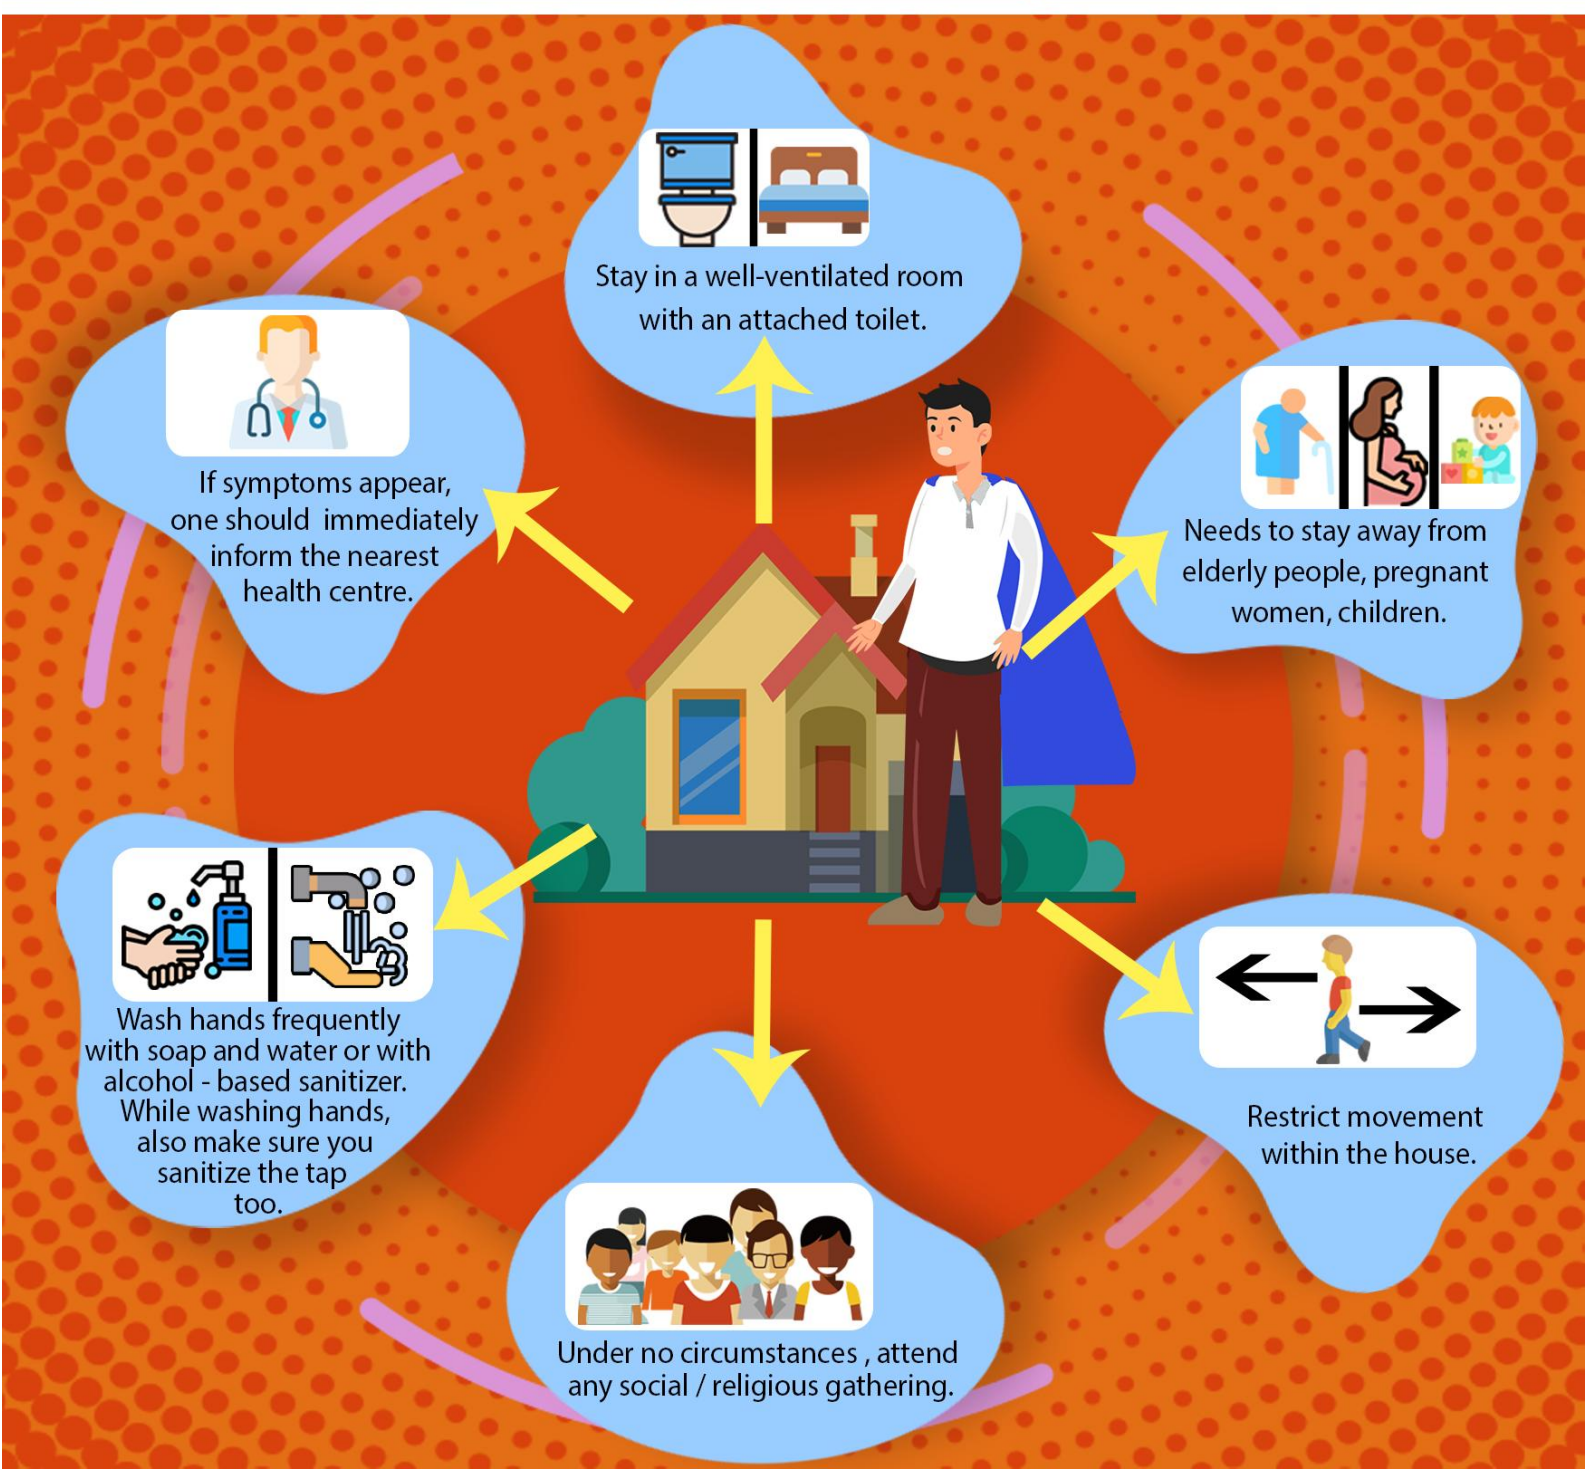

Kids, quarantine help to control the spread of disease, and through this, we can also control the Coronavirus infection.

Hello kids!
This is ISOLATION WARD.
Do you recognize me?

Thanks Vaayu,
we also have some
queries.

Ok! Please ask me.
I will clear all your doubts.

What kind of attention should be given while touching the surfaces and travelling in public transport or while using mobile phone ?

If you are taking a cab or touching lift button or handles of buses immediately wash your hands with water and soap.

Should we eat junk food or egg or chicken?
Does this virus spread by eating chicken ,
eggs and meat products ?

We should avoid junk food, and prefer eating healthy diet. There is no evidence that eating properly cooked meat or chicken cause this infection.

Is there any vaccine for this infection?

No, till now there is no specific vaccine for the infection but prevention is the only key and we must focus on that including government advice.

Do we need to buy expensive masks or surgical masks or will it help?

There is no need of mask for everyone as I told u earlier. If you are ill and have cough, cold or going in crowded place than simple surgical mask is enough. When u cough /sneeze use your elbow near the mouth.

I hope all your queries
are clear now.

Thanks Vaayu.
But I have one?

Pandemic is nothing to do with the number of people affected or die. It means that disease has spread in a large global area. The government and public need to take extra measures to prevent the infection.

This is the reason our schools are closed for few weeks.

Yes.

What about our exam? I prepared hard. We all will remain in the same class?

Don't be panic. Exams will be conducted soon after the disease subsides or you may also be promoted to next class based on your term exams.

I know you studied hard.

Why colleges, big gatherings, cinema and malls are also being closed?

Do you remember that I told you to avoid going to public places and if needed to go, wear a mask as the disease spreads through person to person and also by touching common surfaces.

Yes! We remember.

Some people might be infected with Coronavirus disease, and they may not be showing symptoms.

Hence the government has closed the places where people usually gather. This will help to control community transmission of COVID-19 disease.

We have to stop community transmission. We will follow your instructions Vaayu.

But Vaayu i don't understand how Community Transmission happens?

There are 4 major stages of this disease spread:

STAGE-1
Getting the imported case

People getting infected outside the country having infection.

STAGE-2
Local transmission

The infected case came from outside the country, spreading infection to those who come in contact with them.

STAGE-3
Community Transmission

If the people having infection don't restrict their movement (quarantine) they might spread infection to people whom they don't even know through infected surfaces.

STAGE-4
Turning into an Epidemic

This chain reaction of spread of infection lead to huge explosion of the cases.

Clean floor using common household disinfectant

Don't visit, Malls, Cinema & attend social gathering and big mass events

Don't visit friends and relatives who show flu symptoms

Other Steps Include

Follow Government advice
Janta Curfew
22nd March 2020
7am to 9pm

Stay at home. Read good books, play indoor games, spend time at home with family

Don't fear and support friend or family member in panic

Take precautions while sneezing & coughing

What else can we do to defeat the Coronavirus?

Eat 5 A Day

Eat healthy diet

Yoga and Meditation

Plenty of fluids

Don't consume raw meat

Avoid consuming raw meat.

Follow parent's advice

Vaayu, we learned that the virus dies above 30°C.

Kids, that's not authentic. As based on the current evidence, it can spread to all areas, including geographic location having hot and humid climate.

Does it mean that we can not enjoy our summer vacation?

As we may meet an infected person on a bus, train, or in an aeroplane, hence we should avoid.

Yes, avoid travel as much as possible, but do not worry. It is good to spend quality time together and read books or play indoor.

Vaayu, we also wish to play outside.

Kids, if possible, play inside.

If you really want to go out to play, please follow the following instructions..

After play always wash your hands.

Cover your mouth and nose, while coughing and sneezing.

If you are sick, stay home and use a face mask.

Maintain respectful distance from person who has cold, cough or flu.

Please play inside and avoid gatherings with your friends.

If you really wish to play outside, ensure that your playground area is disinfected from time to time.

Thanks Vaayu, We will play indoors.

Ohh! They are not ghost. I will not be afraid!

That's good. They are doctors, our friends.

They are working hard to save diseased. I will be a doctor one day.

Kids, tell me if someone has Coronavirus symptoms, then to whom he should contact?

To whom ?

Please tell us Vaayu to whom we should contact?

You can call the family physician. There is also a helpline phone number where one can contact.

Helpline number?

Yes, the Government of India has a Coronavirus helpline number : 1075, +91-11-23978046, Email Id: ncov2019@gmail.com, ncov2019@gov.in

Kids there is also a list of helpline numbers for other states & union territories.

सत्यमेव जयते

Government Of India

Helpline Number :
 1075,
 +91-11-23978046
 Email Id : ncov2019@gov.in,
ncov2019@gmail.com

A person with symptoms must tell upfront his recent travel history to the doctor. This will help him to diagnose and treat faster.

This is great Vaayu, Thanks for your help !

Ok kids be safe, bye!

Bye Vaayuuuuu! Meet you next time.

But what happen to Adi father?

After two weeks...

Adi's mom is coming in a car with his father. They all are happy.

How are you, daddy?
I love you and missed you.

I am fine, Adi.
Thanks for your
prayers.

Were you worried?

No Dad, Vaayu guided
me on how to defeat
COVID 19 pandemic.

What he taught you?

He taught us how we can defeat Coronavirus by simple steps.

He gave us public health shield to defeat Coronavirus.

Simple Action for Corona Prevention

That's good. Let's share this with all your friends to defeat the COVID-19 pandemic.

Yes, Dad, together with my friends, we all are sharing good hygiene and prevention strategies to defeat the Corona pandemic.

We are also sharing recently released comics "Kids, Vaayu, and Corona" with our friends.

Are you talking about the book made by Environment & Public Health Professionals of PGI and PU Chandigarh.

Yeah, dad! They are bringing more comic soon on promoting our health and saving environment.

Kids, Vaayu & Smokey
A Tale of Air Pollution
OF THE SOLUTION TO WIN OVER THE POLLUTION
Dr. Harinder Khanna
Dr. Gurnam Marwaha

Good. You must read their comic to save environment and for better health.

Let all be safe, healthy, happy by adopting simple hygiene.

Public Health Shield for COVID-19 Prevention

Vaayu Shield to Defeat Coronavirus: Vaayu, the superhero of this comic, prevented the spread of Coronavirus and defeated it using a shield of public health approach.

This shield is powered by knowledge and experience of the public health experts, medical practitioners, paramedical staff, and other stakeholders who all are working together to stop the spread of Coronavirus and defeat it.

Vaayu is grateful to all of them and especially children, who helped him to win the fight against Coronavirus.
