Hon'ble Shri.Narendra Modiji,
The Prime Minister of India,
South Block, Raisina Hill,
New Delhi-110011.

Subject: Students and parents are facing many problems by oniline classes
And avoid online classes by this letter.

Hon'ble'Prime minister Narendra modi ji,

I am **Durai Diraviyam**, Iam moving from 9th STD to 10th STD, Iam from tamilnadu, its main and center district Tiruchirapalli, I am studying in **ICSE** board of school.

Today's problem of whole country is online classes, From this students and parents are facing physically, mentally, economically and technical challenges, which I want to share this to you from this letter. In this letter I have below said the matter which is not my personal problem, not my family's problem, its whole nations **biggest** problem.

Whole nation schools and college students and their parents facing daily challenges from online classes:

- For joining online classes all should have desktop computer/ laptop/ tab and android mobile and it should have internet facilities, its main for online classes. This facilities will not be in all family. In one family two or more children will study. All should have separate computer / laptop/ mobile and should have internet facilities, it is not possible in india. because in some villages they don't have electricity connection, if they

have electricity it will not be continuous. In some places in india doesn't have internet connection, if they have internet connection it will not be continuous.

- *If students joins in online class technology known person (or) parents should be with them, if parents doesn't with them it may cause electrical fire accidents and they may go to wrong and bad websites it may affect them.*
- *If Parents takes cares children when they are in online class, they were unable to go to job. In this dangerous **corona virus spreading situation** this causes economical problems.*
- *Students those who see online classes for long time will cause eye sight problem, stress, brain tiredness. So they will be physically, mentally and psychologically affected.*

Nations future shining stars are our students, they will be physically, mentally affected by online classes. In dangerous situation stop online classes all over the country, send the order to all states chief ministers and governors.

*In this dangerous situation “**how education is important like that health and life is even more important**” so please “**avoid online classes and protect the health of the students**”*

I am waiting for your positive answer.

Thank you.

*Yours faithfully,
Durai Diraviyam.*
