D.O. Letter No. 393/CMO/2021, Dated: 3-6-2021

Dear *Thiru Harsh vardhan,*
Vanakkam,

At the outset, I would like to thank you for your continued support to our State in tackling the Corona pandemic. While my new Government has been tirelessly striving and has emerged successful in bringing down Covid cases, the emergence of mucormycosis among the patients and sufficient supply of liposomal Amphotericin B, which is being allotted by the Government of India, are increasingly becoming critical issues which need urgent intervention.

After it was declared a notified disease, the State has initiated large scale prevention efforts, by creating greater awareness about the disease and likely causes. It has also started mucormycosis clinics and dedicated wards. So far, 673 cases of mucormycosis have been detected in the State and hence the demand for liposomal Amphotericin B has increased manifold. The State Government has already placed orders for the supply of 35,000 vials of this drug to various vendors. But since the supply is according to the allocation made by the

Government of India, the State has received only 1790 vials, which is woefully inadequate to successfully treat the growing numbers of mucormycosis patients.

Hence, I would request you to kindly instruct the concerned officials to immediately allocate at least 30,000 vials to Tamil Nadu. This is necessary to enable the State to provide adequate treatment to the identified mucormycosis patients who are under treatment in the various hospitals.

I once again request you to bestow your personal attention on our request.

With Warm Regards,

Yours sincerely,

(M.K. STALIN)
